## NEW DR ANNOUNCEMENT

### Collect Biotechnology Ltd

Collect Biotechnology is a global biotechnology group based in Israel. The Company is engaged in the production of regenerative medicine through the development of products facilitating immune stem cell selection. The Company's platform technology is based on the functional properties of stem cells which are used for their identification, selection and utilization. The Company's first product is designed to harness the critical function of sensitivity to specific apoptosis-inducing agents. The Company has established a proof of concept for its technology in animals, and has built a comprehensive IP portfolio protecting its development. The Company is involved in clinical trials and is working on the development of its pipeline.
